

What is claimed is:

1. A liposome containing as a membrane component an active ingredient of a medicament for prophylactic and/or therapeutic treatment of a vascular disease caused by abnormal proliferation of vascular smooth muscle cells.

2. The liposome according to Claim 1, wherein the active ingredient comprises a benzimidazole derivative having suppressing action on foaming of macrophages.

3. The liposome according to Claim 1, which contains as a membrane component a lipid selected from phosphatidylcholines and phosphatidylserines.

4. The liposome according to Claim 1, which contains as a membrane component a phosphoric acid dialkyl ester as being a diester of an alkyl containing 6 or more carbon atoms.

5. A medicament for prophylactic and/or therapeutic treatment of a vascular disease caused by abnormal proliferation of vascular smooth muscle cells, which comprises the liposome according to Claim 1.

6. The medicament according to Claim 5, which is for prophylactic and/or therapeutic treatment of arteriosclerosis.
